# Introduction

This is a dictionary of colloquial Egyptian Arabic, based on the online dictionary available at [www.lisaanmasry.com](http://www.lisaanmasry.com).

This PDF document was generated using PDFReactor, which is available from [www.pdfreactor.com](http://www.pdfreactor.com)

The document is divided into three sections:

- English to Egyptian Arabic
- Egyptian Arabic to English
- Thesaurus

This introduction gives you a brief explanation how to use the document.

## Using the Dictionary

From the [contents page](#), you can click on a letter to go directly to an index of words beginning with that letter.

For Egyptian words, click on an arabic letter to see the index in arabic writing or on the corresponding european letter to see the index in European writing.

Once you have found a word in the index, click on the word to see the full entry for the word. You can then scroll up and down through the dictionary entries.

Alternatively, you can use the bookmarks on the left of the Adobe Acrobat window.

From a word in the dictionary, you can follow the link to a thesaurus category, where you will find words with similar or related meanings.

Each entry in the dictionary is made up of details for one word in English followed by details for one or more corresponding words in arabic.

The details for a word are made up of several lines. The first line contains the language code, the word itself, its grammatical element (verb, noun etc) and any notes about it. If the word has more than one form (for example, perfect and imperfect), the next line will contain a list of all of the forms. The final line shows the thesaurus category for this word.

Arabic words are displayed both in arabic and european writing.

See [abbreviations](#) for a list of abbreviations used in this dictionary

## Using the Thesaurus

The thesaurus offers lists of words with similar or related meanings. Each list of words is called a category; the categories are further grouped into sections.

From the [contents](#) page, you can go to a list of sections, together with the categories in each section.

When you click on a category, you will see a list of english words in that category together with their meanings in arabic. If you click on either an english word or an arabic word, you will go to the dictionary entry for that word, where you will find full details about it.

## I

I  
I didn't mean to...  
I don't care

I have been  
I have had enough  
of...

I love you  
I mean...  
I miss you

I owe you...  
I swear by god  
I think so
